## TECHNICAL SKILLS

JavaScript, React, Redux, HTML5, CSS3, Git, TDD, jQuery, AWS S3

## WORK EXPERIENCE

Oct 2014 – Feb 2017

**Persado, NYC**  
Executive Assistant

Worked closely with the Founder and CEO to ensure meetings, travel, and events were scheduled and organized both internally and externally. Worked on numerous research projects such as offsite planning and implementing a companywide travel management system.

2013 - 2014

**Rutgers University**  
Undergraduate Researcher

Responsible for managing and reporting on the progress of a research project that consisted of the full synthesis, purification, and subsequent data analysis of target compounds. Work included synthesizing a Polymer that interacted with metallic compounds. Work published in ACS Macro letters and Inorganic Chemistry.

## PROJECTS

**IndieFomo**

(Rails, React/Redux, PostgreSQL)  
A crowdfunding web application inspired by Indiegogo that utilizes a React view layer to create a modular single page app, allowing users to create campaigns, rewards, and make contributions. Uses AWS S3 and paperclip to manage and store images.

**Pong**

(JavaScript)  
A JavaScript powered game that utilizes the Canvas API to render the game in the browser. The game is single player, user versus an AI player.

**jQuery**

(JavaScript)  
A DOM manipulation library inspired by jQuery, written in JavaScript. Users can also make AJAX requests and add event listeners.

## EDUCATION

**App Academy, Feb-May 2017**

1000 hour full stack coding school with <3% acceptance rate.

**Rutgers University, 2014**

BS Applied Mathematics and Chemistry
